

Amendment under 37 CFR 1.111
Shigeru HIDESAWA

U.S. Patent Application Serial No. 09/917,761
Attorney Docket No. 010965

IN THE CLAIMS:

Please cancel claims 12-29 without prejudice or disclaimer.

Please amend claim 1 as follows:

B1 1. (Currently Amended) An electronic apparatus comprising an apparatus body, and an electric part detachably attached to the apparatus body,

wherein the electric part is attached to an outer wall of the apparatus body,

wherein said electric part has an electric part body having an outer wall which is arranged in contact with said outer wall of said apparatus body, and the electric part is provided with terminals for accomplishing electric connection of the electric part with the apparatus body and a heat radiating structure for radiating heat generated in the apparatus body.

2. (Original) An electronic apparatus according to claim 1, wherein the heat radiating structure comprises an uneven wall structure allowing a passage of air between an outer surface of the electric part and an outer surface of the apparatus body.

3. (Original) An electronic apparatus according to claim 1, wherein the heat radiating structure comprises a heat radiating member for radiating heat generated in the apparatus body via the electric part.

4. (Original) An electronic apparatus according to claim 3, wherein the electronic apparatus includes a heat radiating member, and said heat radiating member of the electric part is connected to the heat radiating member of the electronic apparatus when the electric part is attached.

5. (Original) An electronic apparatus according to claim 1, wherein the heat radiating structure includes a fan for radiating heat generated in the apparatus body via the electric part.

cont
B1
6. (Previously Amended) An electronic apparatus according to claim 1, wherein the apparatus body and the electric part include a mechanical connection for mechanically connecting the electric part to the apparatus body.

7. (Original) An electronic apparatus according to claim 1, wherein the electric part comprises a battery pack.

8. (Original) An electronic apparatus according to claim 1, wherein the electric part is a connector box to which another part can be further attached.

9. (Original) An electronic apparatus according to claim 1, wherein the electric part extends long along a rear portion of the apparatus body.

U.S. Patent Application Serial No. 09/917,761
Attorney Docket No. 010965

10. (Original) An electronic apparatus according to claim 9, wherein the length of the electric part is not less than half of the length of the rear portion of the apparatus body.

Cond.
B1
11. (Original) An electronic apparatus according to claim 1, wherein the electronic apparatus is a notebook type information processing apparatus having a portion including a keyboard and a portion attached to the portion including the keyboard and including a display.

12-19 (Currently Canceled).
